

3D Angel

A festive folding activity to deck the halls and get your fingers moving!

Follow the instructions to make your own 3D paper angel to hang on your Christmas tree.

What You Need:

- Scissors
- Glue
- String to hang your decoration (optional)
- Craft materials of your choice (optional)
- Colouring pens or pencils (optional)

Method:

1. Cut out the two rectangles and the circle along the solid lines.
2. Fold along the dashed lines, folding the paper over and under to make two concertina-style fans.
3. Close each piece together into a singular strip then fold the top sections of both pieces over and down, so that the diamonds meet.
4. Glue the two dotted sides together up to the dotted line.
5. Then glue the two diamonds together on the outsides.
6. Stretch the wings and body of your angel out carefully and glue your circular head to the top!
7. Decorate with a face, hair and craft materials of your choice - why not hang your decoration on your tree with some string too?!

Cut me out!
