

# Paper Bow Template

## You will need:

1. A printed copy of this sheet
2. Glue or tape
3. Scissors

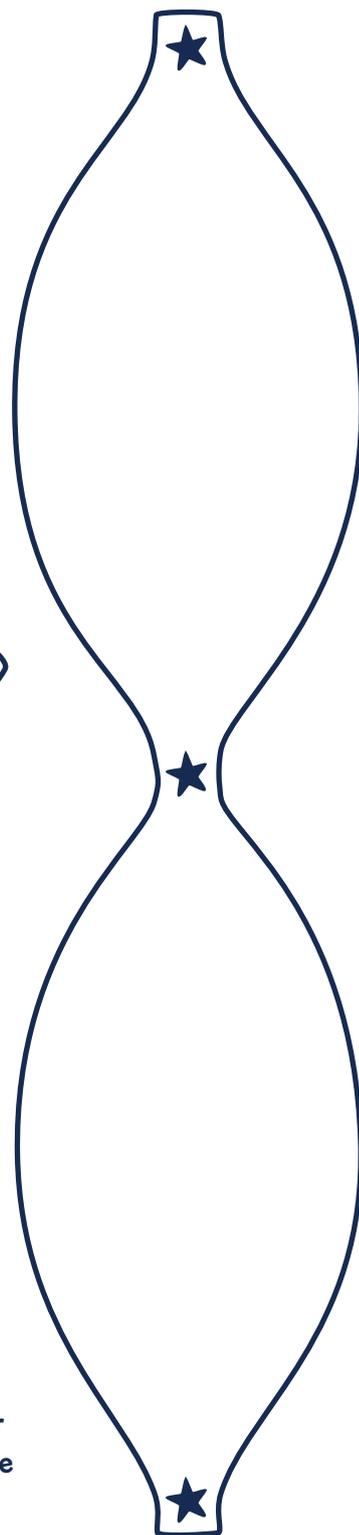

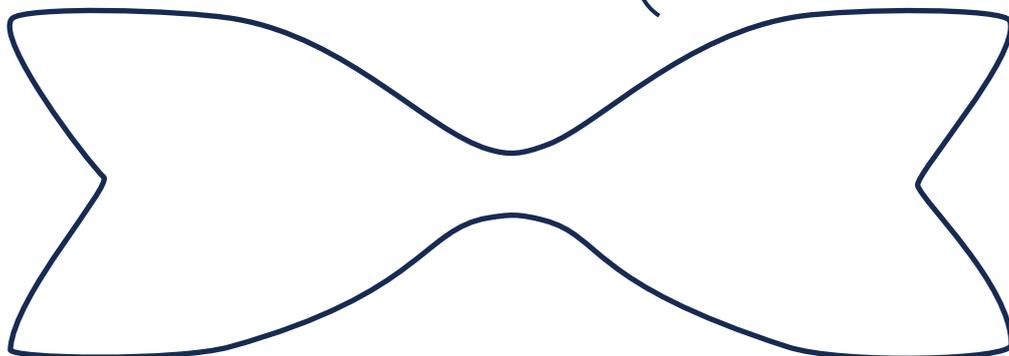

## To make:

1. Cut out each shape along the solid line. Why not try tracing them onto wrapping paper first?
2. Loop each end of the longest piece by sticking the tails to the centre, marked by the stars.
3. Choose which tails to stick your bow to. Then, wrap the small piece around the middle.

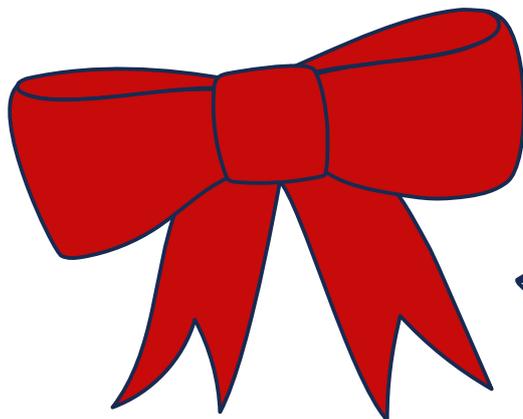

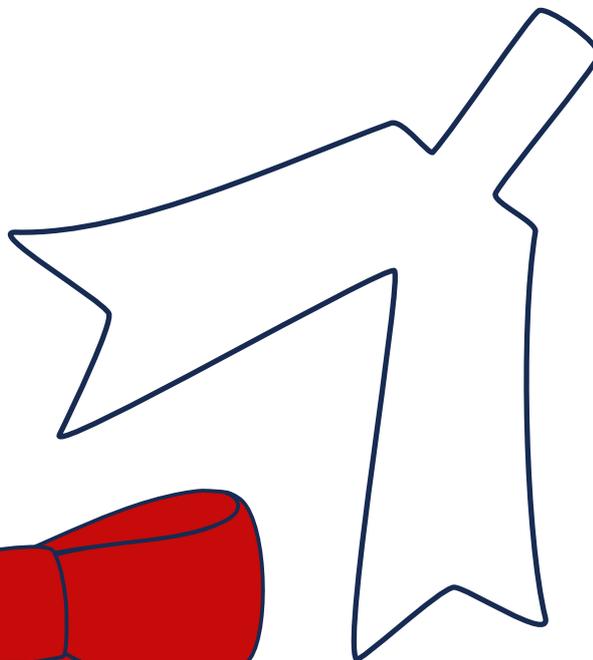

Use these two pieces  
for a bow like the  
one at the top

### Here's an Idea!

Have a go at making your paper bow bigger or smaller so it's the perfect size for the present that you're wrapping.

Use this base for  
a bow like the one  
down here
