

Paper Plate Snow Globe

Get in the festive spirit and have a go at making your own snow globe. Use our template below, or follow the construction instructions and create your own scene to go in the centre.

What You Need:

- 2x paper plates
- Scissors or a craft knife
- Colouring pens/pencils, or alternative craft materials
- Glue, sticky tape or staples
- Optional: confetti, sequins or pom poms for snow

Instructions:

- Cut the centre out of one paper plate, so you're left with one whole plate and one outer ring.
- Create or stick your design on the inside of your whole plate.
- Attach the ring on top so that the underside of the plate faces out, and the rims are together to create a space in between.
- For an extra challenge, why not add some shakeable snow, and cover the hole with a clear plastic wallet to stop it falling out?
