

Planet Trumps - Page 1

Use the planet trump cards on these pages to play a game of Trumps with a friend. Some blank trump cards have been included on pages 3 & 4 so that you can make up your own planets too!

To play:

1. The game is for 2 or more players. The aim of the game is to win the whole deck by choosing your best rating/score and trumping (beating) your opponent's cards.
2. Shuffle the cards and deal evenly to all players, placing the cards face down.
3. Hold your cards face up but only look at the top card.
4. The first player chooses their best statistic/rating from their top card (usually the highest number) and declares it, e.g. "Size: 2,400 km".
5. All other players read out the same statistic from their top cards. The player with the best or highest score wins and places all players top cards, including their own, on the bottom of their own pile. The winning player chooses the skill/characteristic for the next round.
6. The winner is the first player to win the full deck of cards.

You get to decide if higher or lower numbers are better for each category. For example, 66 days full orbit might be seen as better than 225 days, because the planet completes their full orbit in less time!

Mercury

Distance from Sun	58 mill. km
Size (Radius)	2,439.7 km
Average Temperature	167°C
Full Orbit	88 days

PAWPRINT FAMILY

Venus

Distance from Sun	108 mill. km
Size (Radius)	6,051.8 km
Average Temperature	475°C
Full Orbit	225 days

Jupiter

Distance from Sun 778 mill. km

Size (Radius) 69,911 km

Average Temperature -110°C

Full Orbit 12 years

PAWPRINT FAMILY

Saturn

Distance from Sun 1.43 bill. km

Size (Radius) 58,232 km

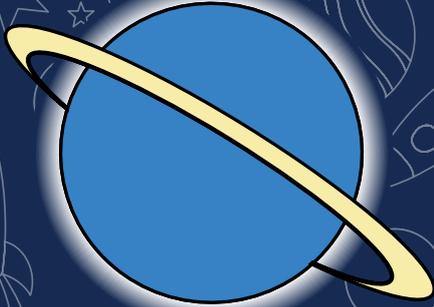

Average Temperature -140°C

Full Orbit 29 years

Uranus

Distance from Sun 2.87 bill. km

Size (Radius) 25,362 km

Average Temperature -195°C

Full Orbit 84 years

PAWPRINT FAMILY

Neptune

Distance from Sun 4.49 bill. km

Size (Radius) 24,622 km

Average Temperature -200°C

Full Orbit 165 years
