

Design Your Own Seed Packet

Use this template to design and create your own seed packet. What seeds will it be for?

To make your seed packet:

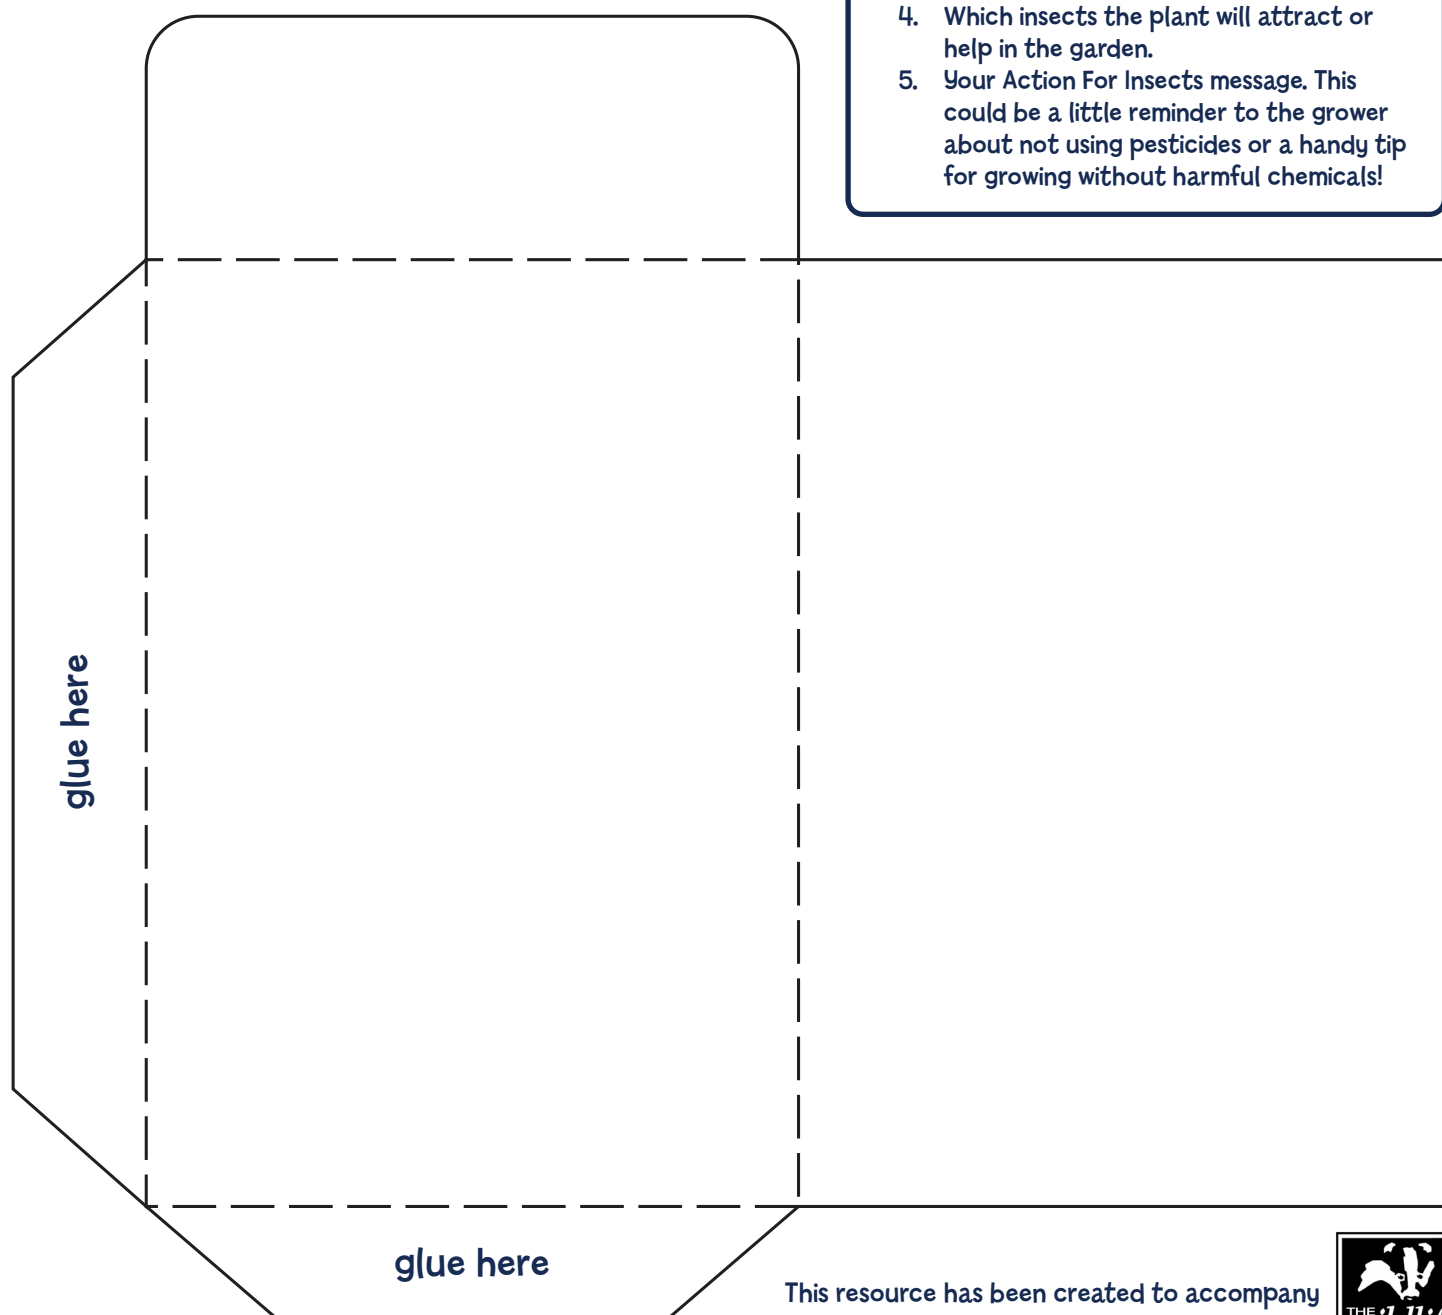

1. Decorate your template, the front is on the left and the back is on the right.
2. Cut along the solid line.
3. Fold along the dashed line, folding the flaps towards the back and away from your decoration.
4. Glue along the two flaps along the side and the bottom (the one with rounded corners is the top where your seeds will go in and out).
5. Stick the back of your seed packet on to the flaps to create your packet.
6. Add your chosen seeds and seal shut.

Remember!

If planting wildflowers only use native seeds as these are the best to help our insects recover. Don't forget to add these things on your seed packet...

1. The name of the flowers, fruit or veg the seeds will grow in to.
2. A picture or drawing of the plant.
3. Growing instructions: where to plant, how much to water and how much sun they need.
4. Which insects the plant will attract or help in the garden.
5. Your Action For Insects message. This could be a little reminder to the grower about not using pesticides or a handy tip for growing without harmful chemicals!

This resource has been created to accompany the Action For Insects challenge badge in partnership with The Wildlife Trusts.

Seed Packet Template

Suggested for ages 5 - 11

To make your seed packet:

1. Decorate your template, the front is on the left and the back is on the right.
2. Cut along the solid line.
3. Fold along the dashed line, folding the flaps towards the back and away from your decoration.
4. Glue along the two flaps along the side and the bottom (the one with rounded corners is the top where your seeds will go in and out).
5. Stick the back of your seed packet on to the flaps to create your packet.
6. Add your chosen seeds and seal shut.

Here's an idea!

Why not make your seed packets and give them as a gift for Christmas or Mother's Day?

Alternatively use your seed packets to spread the Action For Insects message and help your community to create a more insect friendly place. Give your seed packets away as Random Acts of Kindness or hide them in your local community for people to find.
