

Reuse old paper/newspaper and make your own recycled paper

For leaders

Tear up old paper and, using a blender, blend it with lots of water to make your pulp. Using a rectangle of fine wire mesh (or similar), place in the bottom of the tray. Mix the pulp around and create an even layer on top of your mesh. Keeping the mesh flat, carefully lift and allow the excess water to drain through the mesh, into the tray. Place the frame in the sun (or somewhere safe) to dry. When dry, iron your paper on the steam setting to flatten it out!

Age 14 - 18

Age 7 - 11
