

Star Tree Topper

Star of wonder, star of night! Top your tree with a twinkling little star topper. Follow the instructions to make your own and brighten up your Christmas tree.

What You Need:

- Scissors
- Glue
- Craft materials (optional)
- Colouring pens (optional)

Method:

1. Cut out and decorate the back of both stars (not the dashed side!)
2. Cut out the long rectangle and curl around your finger to make a tube. This will slot onto the top of your tree so don't make it too small!
3. Glue your tube together.
4. Place the tube at the bottom of one star (in-between the dashed guidelines) and glue with the tube hole at the top and bottom.
5. Glue the other star to the back of the tube, lining up the tips of both stars.
6. Finally, glue the tips of the stars together, encasing the tube inside the topper.
