

# Design a Stocking - Page 1

Design your own Christmas Stocking to hang on your fire place or at the bottom of your bed!  
Colour in or decorate with craft materials of your choice.

Check out these  
stocking designs  
for some  
inspiration!

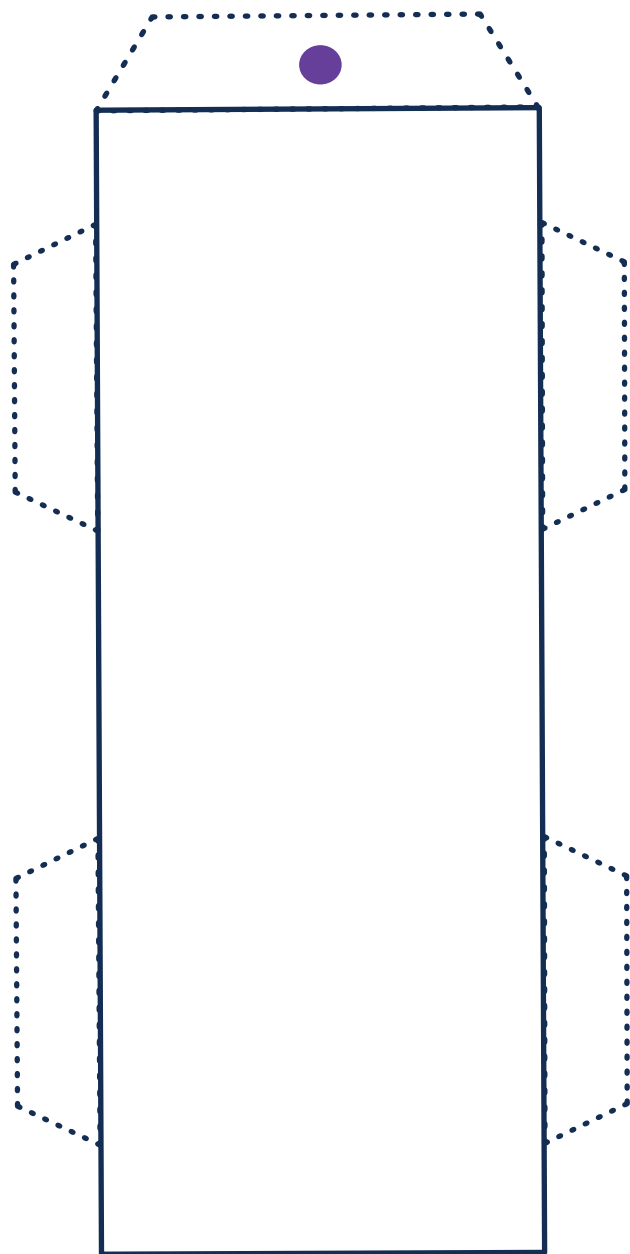

# Design a Stocking - Page 2

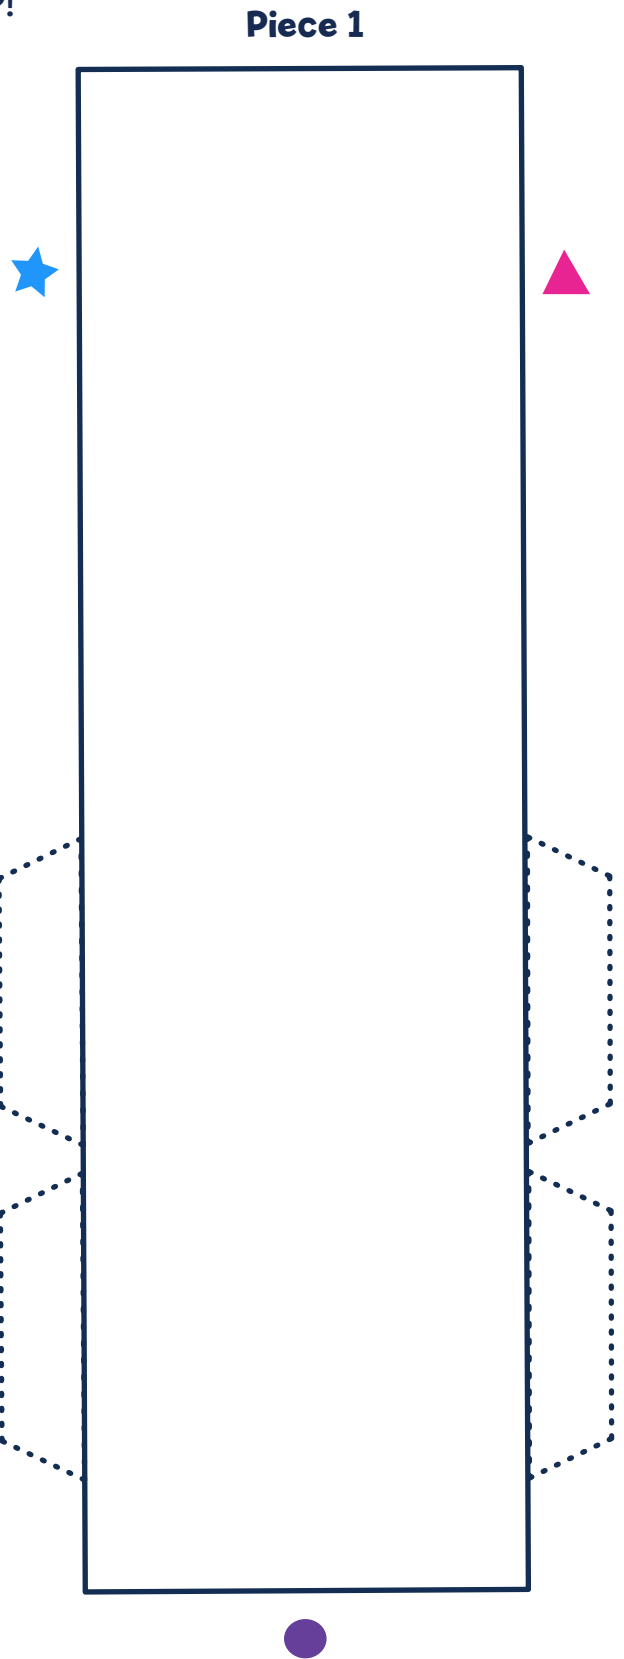

Now that you've designed your own stocking, why not transform your design into a 3D stocking for more of a challenge?!

**Follow the steps below to make a 3D stocking!**

1. Print pages 2 and 3 out on card.
2. Add your design to all 4 pieces (designing before folding will make your stocking easier to decorate).
3. Cut out piece 1 and piece 2.
4. Glue the dotted tab on piece 2 to the back of the dotted side of piece 1.

instructions!

# Design a Stocking - Page 3

5. Cut out pieces 3 and 4.

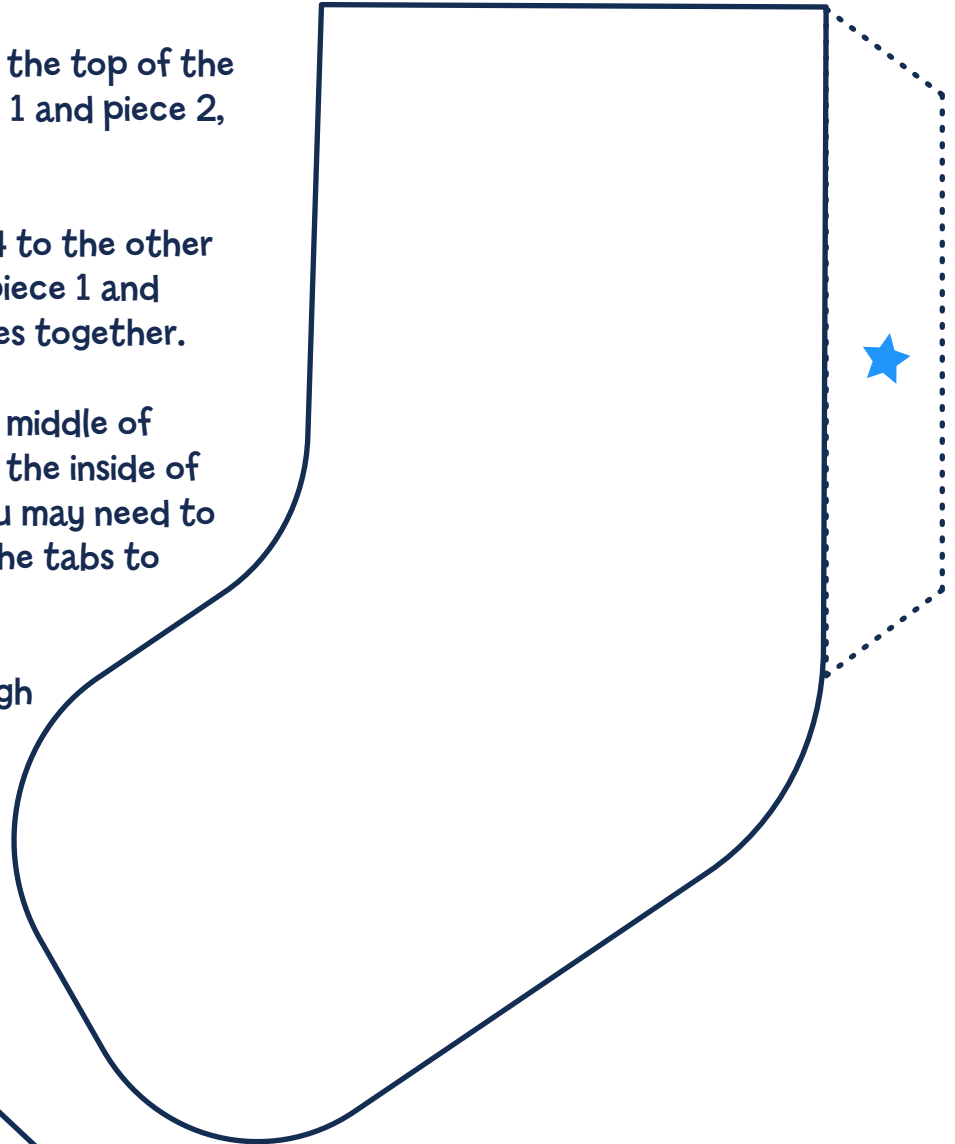

6. Glue the star tab on piece 3 to the top of the long strip made from joining piece 1 and piece 2, matching the two stars together.

7. Glue the triangle tab on piece 4 to the other side of the long strip made from piece 1 and piece 2, matching the two triangles together.

8. Fold the long strip through the middle of pieces 3 and 4, gluing the tabs to the inside of the stocking pieces as you go (you may need to cut down the centre of some of the tabs to fold the piece around neatly).

9. To finish, thread a ribbon through the top of your stocking and fill it with small sweets! Hang your stocking anywhere you like.
