12,000 m

High

23,000 ft
7,000 m

Cb
Cumulonimbus

Mid

6,500 ft
2,000 m

Low

St
Stratus

You Will Need:
- A copy of this resource
- Cardboard (A3 in size)
- Glue or double sided tape
- Scissors
- Craft knife (optional)

To Make Your Window:
1. Cut out the cloud identification image from both pages, cutting along the dashed line.
2. Glue along the shaded area down the right hand side.
3. Stick page 2 over the top along the solid hairline to create one large image.
4. Stick the whole image on to your cardboard.
5. Cut out and remove the viewing window (this area) using your craft knife.
6. Head outside and see if you can identify some clouds!

Here's an Idea!
Why not spend some time cloud spotting for one of your 30 Days Wild activities? Alternatively, create your own version of the clouds by sticking cotton wool to paper.
